

5 GENE REGULATION IN TRANSGENIC ANIMALS USING A TRANSPOSON-BASED VECTOR

10 5 ABSTRACT

15
10
Administration of modified transposon-based vectors has been used to achieve
stable incorporation of exogenous genes into animals. These transgenic animals
produce transgenic progeny. Further, these transgenic animals produce large
quantities of desired molecules encoded by the transgene. Transgenic egg-laying
102 animals produce large quantities of desired molecules encoded by the transgene and
deposit these molecules in the egg.
